

**Sample responses:**

- Protecting the safety of citizens, their property, and the environment.
- Identifying HazMat that is produced, used, or stored in or transported through the jurisdiction.
- Determining the quantities of chemicals in the jurisdiction.
- Improving response capability for the most likely incidents.
- Determining what additional resources will be required and what emergency mutual aid compacts (or EMACs) are necessary for the highest-risk responses.
- Using the information as guidance for training HazMat and other personnel.
- Improving planning for necessary equipment purchases.

**Your Response:**
