

Category	Description
Immediate (I)	Victim has life-threatening injuries (airway, bleeding, or shock) that demand immediate attention to save the person's life.
Delayed (D)	Injuries don't jeopardize the victim's life. The victim may need care, but it can be delayed while triaging other victims.
Minor (M)	Victim has insignificant injury (e.g., minor abrasion on a knee). The victim may need minor care, and might also assist rescuers in helping others with more serious injuries.
Dead	Not breathing after two attempts to open the airway. There isn't time or resources to do CPR if others need immediate help.
