

SAFEGUARDING YOUR VALUABLES

FACILITATOR GUIDE

FEMA

ACTIVITY: PROTECTING VALUABLES

Purpose: The purpose of the activity is to provide steps to take to protect valuables from damage due to fires, floods, or other disasters.

Objectives:

- Identify valuables (including information) you need to protect if a disaster occurs.
- Identify low-cost or no-cost measures to protect valuables from damage due to fires, floods, or other disasters.

Preparation and Needed Materials: Prior to conducting this activity, you may want to:

- Gather information from local banks about safe deposit boxes and have that information on display.
- Work with local merchants to get donations of items such as computer storage devices, waterproof containers, etc.
- Prepare display items such as a family safe box, computer storage devices (USB drive, CD/DVD), and waterproof storage containers.

Presentation Tips:

- Welcome participants to the session.
- Explain that by the end of the session, they will be able to identify valuables that should be protected from flood damage and describe low-cost or no-cost protective measures.
- Ask participants to look in their wallets, purses, pockets, etc. Ask them to identify the items that would be difficult or impossible to replace. Next, ask participants to think about the items that could be lost if their homes were damaged by fire, floods, or other disasters.
- Acknowledge the answers and then present the following key points:
 - Valuables include costly or irreplaceable items such as photos of family members, family keepsakes, or other treasured things.
 - Valuables also include items that are difficult to replace, such as vital records and financial documents.
 - Simple measures can be taken to protect these valuables.

FEMA

ACTIVITY: PROTECTING VALUABLES

Presentation Tips: (Continued)

- Distribute the Protecting Valuables checklist and give participants a few minutes to review it.
- Distribute the Protecting Valuables tips.
- Ask participants if they have any questions about the information covered in the handouts.
- Thank the participants for attending the session.

SAFEGUARDING YOUR VALUABLES

PROTECTING VALUABLES: CHECKLIST HANDOUT

FEMA

You may have little or no time to protect your valuables in a flood, earthquake, or other disaster. By taking simple steps now, you can safeguard your treasured belongings and information from damage or loss.

The first step is to identify what you have. Go through your home to find your treasures. Use the list below to check off your valuables.

- Vital records (birth, marriage, divorce, adoption, child custody, death certificates)
- Passport, driver's license, or other identification documents
- Social Security cards
- Property leases, deeds, mortgages, and records
- Financial documents including copies of pay stubs, bank accounts, etc.
- Legal titles (auto, home)
- Insurance policies
- Wills, living wills, and powers of attorney
- Recent tax returns
- Medical records including lists of prescription medicines, medical conditions, medical provider contact information, copies of health insurance/Medicare/Medicaid cards, etc.
- Debit/credit card numbers
- Home/bank safe deposit information/keys
- Records of passwords and personal identification numbers (PINs)
- Family photos, keepsakes, jewelry, or other mementos
- Photographic or data inventory of valuables (photos, videos, CD/flash drive)
- Other _____

The Protecting Valuables: Tips handout suggests ways to protect these valuables.

SAFEGUARDING YOUR VALUABLES

PROTECTING VALUABLES: TIPS HANDOUT

FEMA

You can take simple no-cost or low-cost steps to protect your valuables.

- Create a photographic record or inventory of your valuables and store it in a safe deposit box or other off-site location. Consider keeping a copy on a CD or flash drive in your disaster kit, so that you can provide it to your insurance company following a loss; this will allow you to start the insurance/recovery process more quickly.
- Scan important records such as vital records, medical records, and financial documents, and save the files on disk or flash drives. You may also want to password-protect the data you have stored in case of loss or theft. Store the backup records in a safe deposit box or other off-site location.
- If you have too many records or no way to scan/copy them, store them in a flood/fireproof home safe or a safe deposit box. Also consider giving backup copies of important documentation to family members to store for you.
- If you have valuable items stored in a basement, move them to a higher location to avoid water damage.
- Include any readily accessible records, such as medical records, medical contact information, etc., in your disaster kit.
- In some cases, you may be able to protect valuables such as keepsakes in waterproof containers available in sporting goods or hardware stores. For smaller items, a flood/fireproof home safe may provide temporary protection.
- Take precautions to protect yourself from identity theft when you create backup systems to store critical information.
