Step 1: Understand the Emergency Management Mission

Step	1: Understand the Emergency Management Mission	<u> </u>				
	Does your jurisdiction's emergency management mission: Promote coordination and integration? Include preparedness? Address all hazards? Do you integrate emergency management into daily decisions, not just during times of disaster? While protecting the population is a primary responsibility of government, it cannot be accomplished without building partnerships among disciplines and across all sectors, including the private sector and the media.	Preparedness is the actions taken to plan, organize, equip, train, and exercise to build and sustain the capabilities necessary to prevent, protect against, mitigate the effects of, respond to, and recover from those threats that pose the greatest risk.				
Step 2: Review Your Authorities						
	Do you know what your authorities are for: ☐ Developing and promulgating emergency plans and standards for emergency management? ☐ Proclaiming a state of emergency?	A state of emergency is a governmental declaration that may suspend some normal functions of the				

A state of emergency is a governmental declaration that may suspend some normal functions of the executive, legislative, and judicial powers; alert citizens to change their normal behaviors; or order government agencies to implement emergency preparedness plans.

□ Proclaiming a state of emergency?

☐ Requesting assistance from other jurisdictions and the State?

☐ Disseminating information and warnings?

☐ Designating highways as emergency management routes?

☐ Imposing restrictions during an emergency (e.g., controlling traffic, closing or restricting areas, or imposing curfew)?

☐ Ordering evacuation and restricting reentry?

☐ Has your jurisdiction met requirements that:

☐ Officials are trained in emergency management?

☐ A local emergency operation plan is developed and maintained?

☐ A director of emergency management is appointed?

☐ The National Incident Management System (NIMS) is adopted?

NIMS provides a consistent nationwide template to enable all government, private-sector, and nongovernmental organizations to work together during domestic incidents.

Step 3: Learn About Your Team

	Do	you know:	In an ideal situation, the
		How the emergency management organization is	emergency manager answers directly to the
		structured?	jurisdiction's chief elected
		Emergency management roles and responsibilities?	official. In this arrangement, the elected
		Reporting authorities?	official has direct access to unfiltered information from
	На	ve you met with:	the emergency manager.
		The emergency management director?	
		Key department directors and staff?	
Step 4	4: I	Review Your Plans and Resources	
	Dο	es your jurisdiction's emergency operations plan	
_		OP):	
	_	,	An emergency operations plan is an ongoing plan for
		Address all hazards?	responding to a wide
		Outline how all actions will be coordinated?	variety of potential hazards.
		Include plans for protecting the whole community?	
		Detail who is responsible for carrying out specific	
		actions?	
		Identify the personnel, equipment, facilities, supplies, and	
		other resources available?	
	Do	es your jurisdiction have other types of plans that	
	su	pport and supplement the EOP, such as a:	Continuity plans outline essential functions that
		Preparedness plan?	must be performed during an incident that disrupts
		Continuity plan?	normal operations, and the
		Recovery plan?	methods by which these functions will be performed.

☐ Prevention and protection plan?

☐ Mitigation plan

Step 4: Review Your Plans and Resources (Continued)

	Communications/Dispatch Center: The agency or interagency dispatch center, 911 call center, or emergency control or command dispatch center that handles emergency calls from the public and	Before a crisis, you should be familiar with the physical layout and roles of the emergency resources and facilities.		
	communication with emergency management personnel.			
	Emergency Operations Center (EOC): The physical location at which the coordination of information and resources to support incident management (on-scene operations) activities normally takes place. An EOC may be a temporary facility or may be located in a more central or permanently established facility, perhaps at a higher level of organization within a jurisdiction.			
Do	es your jurisdiction have resource management			
pro	ocedures for:	Resources include personnel and major items		
	Describing, inventorying, requesting, and tracking resources?	of equipment, supplies, and facilities.		
	Activating and dispatching resources?			
	Managing volunteers and donations?			
	Demobilizing or recalling resources?			
	Financial tracking, reimbursement, and reporting?			
Do	mutual aid agreements:			
	Provide a mechanism to quickly obtain emergency assistance from other jurisdictions or organizations?	Mutual aid agreements provide a mechanism to quickly obtain emergency		
	Specify request, response, and administrative procedures?	assistance.		
ls t	raining provided to:			
	All personnel and partners with roles in emergency management?			
Are	e exercises used to:			
	Test and evaluate plans, policies, and procedures?			
	Identify resource gaps and shortfalls?			
	Improve interagency coordination and communication?			

Step 5: Know How To Lead During a Crisis

Are	Are you prepared to lead during a crisis by:		
	Delegating authority to on-scene responders?		
	Instilling confidence in the public that the incident is being managed effectively?		
	Making policy decisions and securing needed resources?		
	Building partnerships and alliances?		
Do	you know how to request additional resources from:		
	The private sector and nongovernment organizations?		
	Other jurisdictions?		
	The State?		
Do	you have public information procedures for:		
	Disseminating accurate and timely information to the whole community?		
	Ensuring consistency – that everyone is speaking with one voice?		

Your role is not to set command objectives or direct tactical operations. Rather, officials delegate this role to Incident Commanders and first responders who are qualified to manage the incident.

Step 6: Promote Community Preparedness

□ Does your community preparedness program foster:

- ☐ Collaboration with community leaders from all sectors for effective planning and capacity building?
- ☐ Integration of nongovernmental assets and resources into government plans, preparations, and disaster response?
- ☐ Individual and family preparedness on how to prevent, protect, mitigate, prepare for, and respond to all threats and hazards?
- □ Volunteer service for supporting community safety and critical surge capacity in response and recovery?

Individuals and households are at the core of our Nation's preparedness. A community's ability to respond to or recover from a disaster depends on the level of preparedness of every member.
